## CORONARY/CARDIAC CT

- Coronary CTA w/FFR\* (75574, 75580)  
*\*FFR only performed when indicated in accordance with current guidelines*
- Coronary CTA (75574)  
    \_\_\_ S/P Prior Bypass  
    \_\_\_ S/P Prior Stent
- Coronary CTA w/ Ejection Fraction (75574)
- Cardiac CTA Pre-EP/Left Atrium (75572)
- Cardiac CTA for Congenital Heart Disease (75573)
- Coronary CTA, CTA Chest, Abdomen, Pelvis for Pre TAVR/TAVI Planning (75574, 71275, 74174)
- Coronary Artery Calcium Score (75571)

## ULTRASOUND

- Carotid Duplex (93880)
- Abdominal Aorta Complete Duplex (93978)
- Echocardiography (93306)

## AORTA & PE STUDY

- CTA Chest r/o PE (71275)
- CTA Chest (71275)
- CTA Abdomen (74175)
- CTA Other: \_\_\_\_\_

## NUCLEAR MEDICINE

- RadioNuclide Ventriculography (MUGA Scan) (78472)

## X-RAY

- Chest PA/Lateral (71046)

### Coronary CTA Exam Prep Instructions:

- No food for 4 hours prior to the exam
- Drink plenty of water or clear fluids without caffeine up until time of exam (patient should be well hydrated for renal protection, for ease of establishing venous access, and to avoid post-procedure hypotension).
- No caffeine products for 12 hours prior to exam because they might hinder efforts to reduce the heart rate before scanning. This includes coffee, tea, energy drinks, energy pills, diet pills, and most soda.
- Avoid exercise and nicotine for 8 hours before scan.
- Avoid medications for Erectile Dysfunction or Female Sexual Arousal Disorder such as Viagra or Cialis for 72 hours before exam.
- Take all other regular medications the day of the exam, especially blood pressure medicine.

### Medication Prep for Coronary CTA Studies:

In order to decrease cardiac motion and improve diagnostic accuracy, a heart rate of 60 bpm or less is optimal at the time of image acquisition.

### Suggested Premedication Protocol:

- Medication for resting heart rate 60-69 bpm; 50mg Metoprolol Tartrate by mouth one hour before scheduled scan time.
- Medication for resting heart rate ≥70 bpm; 100 mg Metoprolol Tartrate by mouth one hour before scheduled scan time.
- Pre-scan medications should be prescribed by referring clinician . Contraindications to Metoprolol include sinus bradycardia, severe aortic stenosis, allergy to beta blockers, COPD/Asthma requiring use of inhaler, heart block, uncontrolled heart failure or blood pressure less than 100/60 mmHg.

Please Bring ID, this form and your insurance card with you on the day of your exam. [HoustonImaging.com](http://HoustonImaging.com)

### General information

1. It is required that we have a doctor's order to perform your exam, with the exception of screening mammography and Enhanced Prostate Screening (EPS).
2. Please bring a valid id card with you along with your insurance card.
3. Some exams require insurance authorization.
4. Please plan on completing registration forms prior to your exam.
5. If possible, dress in loose, comfortable, two-piece clothing. For MRI exams, no belts, or zippers and leave your valuables at home.
6. To expedite your final results to your physician, please bring any prior exam reports/images needed for comparison.
